Education

Master of Computer Applications — MIT World Peace University (Expected Jul 2026)
CGPA: 6.70 / 10.00
Bachelor of Computer Applications — Veer Narmad South Gujarat University (Oct 2021 – Mar 2024)
CGPA: 7.33 / 10.00

Technical Skills

- **Languages:** Java, Dart, Python, C/C++, SQL, HTML/CSS, XML
- **Frameworks:** Flutter, ReactJS, Android SDK, Spring Boot
- **Developer Tools:** Git, GitHub, VS Code, Android Studio, IntelliJ IDEA, Linux, Azure
- **Databases:** Firebase, Supabase, MySQL, SQLite, PostgreSQL

Experience

Flutter Developer – GAIA Project | *MIT-WPU* | Jul 2025 – Dec 2025

- Built and launched an official university management app on the **App Store** and **Google Play** using **Flutter.**
- Handled end-to-end mobile development, including responsive **UI design**, **REST API** integration, and cross-device performance optimization.
- Streamlined campus operations by replacing manual paperwork with a centralized digital platform for **real-time** progress tracking.

Play Store :- WPU-Immersions
App Store:- WPU-Immersions

Android Developer Intern | *BrainyBeam Technologies Pvt. Ltd. Jan 2026 – Present | Remote*

- Developing and maintaining native Android applications in a remote environment, focusing on writing clean, efficient, and scalable code.
- Collaborating with the development team to design intuitive user interfaces, integrate backend APIs, and enhance overall app functionality.
- Actively troubleshooting bugs, optimizing app performance, and participating in daily development workflows to ensure a smooth experience across various Android devices.

Projects

Daily Dine — Mess Management System | *Aug 2025 – Present*
Technologies: Flutter, Spring Boot, ReactJS, Azure

- Built an end-to-end mess management platform featuring QR-based meal tracking for streamlined operations.
- Designed responsive administrative dashboards and implemented real-time analytics.
- Configured secure payment gateways and established robust role-based access controls.

Hungryfine — Food Delivery App *Technologies: Java, Android, Firebase, Razorpay*

- Developed comprehensive seller and customer mobile applications equipped with real-time order tracking.
- Engineered a scalable backend utilizing Firebase, successfully managing 5,000+ monthly orders.
- Integrated Razorpay to facilitate smooth and secure digital transactions.

MitConnect — Social Video Chat App *Technologies: Flutter, Firebase*

- Designed a modern, engaging user interface utilizing an anime-style aesthetic and glassmorphism design principles.
- Integrated Firebase modules to successfully simulate real-time chat and video call functionalities.

Certifications

- **React Native** – *Meta*
- **Android App Development** (7 Real-World Java Projects)
- **Java for Programmers** Crash Course
- **Mobile App UI Design** (Moqups)
- **Git for Beginners**
